

SOMERSET COUNTY JOINT INSURANCE FUND

Concentra Telemedicine

Concentra Telemed™ is the first telemedicine product designed for work-related injuries. Everything about it—from the easy check-in to the fast triage and diagnosis—is designed to make the occupational injury process easier for you and your workers.

The idea for Concentra Telemed started when we discovered that up to 30% of the initial injuries we see could be treated via telemedicine. This number jumps to 60% for injury rechecks. That's a lot of workers that could be seen without leaving the worksite—saving a lot of lost working hours and productivity for our customers.

Our solution: Concentra Telemed. It's a simple, convenient app that connects workers and licensed Concentra clinicians via smartphones, tablets, and computers. Using video conferencing, the clinician can diagnose, treat, and even prescribe medication.
